## **Statement from Planned Parenthood Advocates in Missouri**

With Eric Greitens' resignation, it's time to close this shameful chapter and for those in power to protect the rights of all people, including women, across our state. The policies enacted under the Greitens administration have hurt women, restricted their right to access health care, and limited their autonomy and integrity. Missourians deserve better. Planned Parenthood Advocates of Missouri will work toward a future where women's voices and rights are respected, and all Missourians have access to the health care they need. We call on Missouri's next governor, Michael Parson, to trust women and their ability to make their own reproductive health decisions.
