

ABORTION IS HEALTH CARE.

How the ROE Act will break down entrenched, unjust barriers to safe, legal abortion in Massachusetts.

In 1973, the Supreme Court guaranteed the right to safe, legal abortion. Since then, politicians across the country have passed countless laws to shame, coerce, and punish people seeking abortion care. Now, the Trump-Pence administration has launched a full scale attack to infringe on our freedoms and take away our rights, including access to abortion.

Even in Massachusetts, people face entrenched, unjust barriers to safe, legal abortion.

We need the ROE Act to break down these barriers to health care in Massachusetts.

The ROE Act will improve access to affordable abortion by removing unnecessary, burdensome laws that delay and deny care. This comprehensive legislation will do the following:

Protect the health, safety, and privacy of young people.

For young people who are unable to talk to their parents, the current law requires they stand before a judge and plead their case. Young people seeking an abortion don't need a judge; they need support and access to health care information and services. The ROE Act builds safeguards for young people, and relieves unnecessary burdens.

“The judicial bypass process forced me to skip school, delay my abortion, and left me in constant fear that I would be punished.”
Jasmin,
Dorchester

Ensure medical decisions remain between a patient and their doctor.

The current law puts people and their families in the unimaginable situation of needing to end a pregnancy for serious medical reasons, but unable to do so, forcing people to travel across the country to access an abortion later in their pregnancy. The ROE Act expands access to abortion after 24 weeks of pregnancy in cases of fatal fetal anomalies.

Lead the way in ensuring equitable access to abortion.

Everyone deserves the opportunity to lead a healthy life, no matter who they are or where they come from. That's why the ROE Act ensures safety net coverage for abortion care which already exists for all other pregnancy-related care for people excluded from MassHealth.

Bring our laws into the 21st century and reduce stigma around abortion.

Did you know there's an unenforced law requiring a 24-hour waiting period for abortion in Massachusetts?

The ROE Act abolishes medically unnecessary restrictions, reforms inflammatory and inaccurate legal definitions relative to pregnancy and abortion, and eliminates unwarranted intrusions and criminal penalties for doctors that provide abortion care. The bill also codifies reproductive freedom into state law.
